

Licking County Animal Shelter

New Construction

A +/- 4,800 Sq. Ft. masonry facility consisting of separate large and small animal areas, observation area, food preparation with storage, drive – in animal receiving and lobby /administration area.

The two (2) large animal areas each contain ten (10) glazed block, dual pens separated with a remote operated guillotine type gate. In all areas that contain animals, the walls and floors are epoxy coated for ease of cleaning.

Our office also designed a separate crematory building that was erected subsequent to the occupancy of the animal shelter.
